Professional Summary

Full Stack Developer with 2+ years of experience designing, developing, testing, debugging, and optimizing production-ready web applications using React.js, Node.js, Express.js, MongoDB, MySQL, JavaScript, and TypeScript. Delivered 25+ RESTful APIs supporting 2,000+ active users, reduced API response time by 40%, and improved database data-fetching performance by 35% through MongoDB query optimization and aggregation pipelines. Experienced in MERN Stack development, JWT authentication, RBAC, Socket.IO, database design, payment integration, real-time applications, AI/LLM API integration, Git, Agile, SDLC, and performance optimization.

Technical Skills

- Programming Languages: JavaScript (ES6+), TypeScript, Java, C, Python
- Frontend Development: React.js, Vue.js, Vite, HTML5, CSS3, Responsive Web Design, SPA, React Hooks, Context API, Redux Toolkit, Axios, Component-Based Architecture
- Backend Development: Node.js, Express.js, REST APIs, RESTful Web Services, API Development, API Integration, MVC Architecture, CRUD Operations, JWT, Authentication, Authorization, RBAC, Socket.IO, Input Validation, Error Handling
- Databases: MongoDB, Mongoose, MySQL, Database Design, Data Modeling, MongoDB Aggregation, Query Optimization, Database Optimization, Indexing, SQL Queries
- Cloud & Services: AWS S3, Cloudinary, Firebase, Vercel, Razorpay, Third-Party API Integration
- AI & Automation: OpenAI API, Groq API, LLM Integration, Prompt Engineering, AI Application Development, Playwright, Browser Automation, Web Scraping
- Tools & Practices: Git, GitHub, GitLab, Postman, VS Code, npm, SDLC, Agile, Scrum, Debugging, Performance Optimization, DSA

Professional Experience

Agami Technology

Full Stack Developer

Jan 2024 – Mar 2026
Noida, Uttar Pradesh, India

- Developed and maintained production-ready full-stack applications using React.js, Node.js, Express.js, MongoDB, MySQL, JavaScript, and REST APIs, supporting 2,000+ active users.
- Architected and delivered 25+ RESTful APIs for authentication, user management, messaging, notifications, CRUD operations, and business workflows using Node.js and Express.js.
- Secured application resources with JWT authentication, authorization, and Role-Based Access Control (RBAC) across 3+ role-specific access levels.
- Engineered real-time chat and messaging using Socket.IO for 1,500+ users, achieving sub-200ms message latency and responsive communication.
- Optimized MongoDB queries, indexing, and aggregation pipelines, improving data-fetching performance by 35% and reducing average API response time by 40%.
- Streamlined real-time notification workflows, increasing application interaction rate by 25% across core application modules.
- Crafted reusable React.js components, dashboards, forms, tables, and CRUD interfaces using React Hooks, Context API, Axios, HTML5, and CSS3.
- Extended applications to cross-platform mobile using Capacitor, contributing to a 40% increase in mobile adoption.

Projects

SRL Transport | React.js, Vite, Node.js, Express.js, MongoDB, Socket.IO, AI/LLM | Live Demo | GitHub 2026

- Engineered a full-stack transport platform with 2 major interfaces: a public customer website and an admin dashboard covering booking, price estimation, tracking, fleet, driver, and payment workflows.
- Delivered 4 core operational modules using React.js, Node.js, Express.js, MongoDB, and Mongoose, with JWT authentication, Redux Toolkit state management, and 2 Recharts analytics visualizations.
- Integrated a real-time AI customer support chatbot using Socket.IO with 2-way communication and human handoff, enabling instant responses and persistent chat state.

Study Orbit | React.js, Node.js, Express.js, MongoDB, Razorpay, Cloudinary | Live Demo | GitHub 2025

- Delivered a MERN-based EdTech platform using 6 core technologies: React.js, Node.js, Express.js, MongoDB, Razorpay, and Cloudinary for instructor and student workflows.
- Orchestrated 5+ end-to-end workflows including OTP authentication, course management, student enrollment, Razorpay payment processing, and user management through secure REST APIs.
- Integrated Cloudinary media storage and 2 frontend performance techniques, lazy loading and reusable React components, to improve media handling and application usability.

AI Job Hunter | React.js, Node.js, Express.js, MongoDB, Playwright, Groq API | GitHub 2026

- Engineered a full-stack AI-powered job search and application platform using 6 technologies: React.js, Node.js, Express.js, MongoDB, Playwright, and Groq API.
- Implemented 4 AI-driven job analysis capabilities using Groq API: resume-to-job matching, job match scoring, matched and missing skill identification, and automated job summaries.
- Automated 3 browser workflows using Playwright for job discovery, application assistance, and duplicate prevention with authenticated sessions, validation, rate limiting, and error handling.

Education

Rajkiya Engineering College Banda

Bachelor of Technology (B.Tech) in Information Technology | CGPA: 7.82

Jun 2023
Banda, Uttar Pradesh, India

Intermediate College Bhatawali Bazar

Higher Secondary Education (UP Board) | Percentage: 76.4%

May 2018
Gorakhpur, Uttar Pradesh, India

Certifications & Achievements

- Certifications: Frontend Developer (React), Node.js (Intermediate), SQL (Intermediate), JavaScript (Basic), Problem Solving – HackerRank.
- Achievements: 5-Star Java Badge on HackerRank; solved 500+ coding problems across LeetCode, HackerRank, and GeeksforGeeks; ranked 3rd in the Information Technology Department.
